**AMAZING & INTELLIGENT CLOUD DESIGN PLATFORM**

MODULE FUNCTIONS

PROCESS FEATURES

Intelligent Recognition
One-click smart presentation of house type, style and accessories

Millions Of Models And Materials
All-category 3D models and textures are ready-to-use for efficient matching design

Multiple Outputs
Renderings, panoramas, CAD, hydroelectricity diagrams to meet different needs

Delicacy Management
Freely manage solutions, stores, customers and products.

2D -3D Intelligent Generation > Professional Design Module { Tile/Ceiling Kitchen Wardrobe System Cabinet Sanitaryware Water/Electricity } > Fast Cloud Render Platform { CAD drawing Floor plan Panorama Renderings Quotation }

PLATFORM EMPOWERMENT

Brand Gallery
Accelerate the global promotion of companies, the product supply chain will be promoted and cooperated globally with the 3D home design software as the platform. Global users will share the global trillion-dollar home market by designing the 3D vertical procurement model to achieve a win-win situation.

Design Gallery
Exclusive store and designer's program display platform, unlimited display space, benefiting interaction between design and customers, multi-channel social media links to have more customers flow.

Supply Chain
One-stop procurement of all categories, direct supply to the distributed supply chain center; no warehouse, no inventory, light asset operation, one-stop experience; The shortest distance between people, goods and objects is the most efficient ecological closed loop.

Design To Production
Integrate design and production data, one-click seamless production docking, bar code tracking, production flexibility and informationization, interconnection with global designers, design direct factory. What you see is what you get.

Wardrobe Design
Parametric cabinet design, successfully avoid the beam and column;
One-click intelligent accessories arrangement.

Tiling & Bathroom Design
Plenty of water jet pattern, which can be uploaded directly in cloud library;
Professional design function and diversified tiling for the whole house.

Ceiling, Wooden Door & hydroelectricity
Parametric design of various complex ceilings and wooden doors,
Intelligent hydroelectricity construction design, visually display technology and engineering concealed.

Customized Furniture & Cloud Manufacturing System
Integration of design and production, one-click splitting, material optimization, seamlessly docking production, barcode tracking production, production flexibility and informationization.

Features:

Generation of 3D house type
Intelligent layout
Accurate quotation
CAD output
Whole house style change
Material collection
Parametric design
Non-standard design

Arrangement of accessories
Countertops installation
Accessories and electricity installation
Five drawings guide construction
Intelligent power distribution system
Automatic avoidance of hydropower lines
Output of construction drawings

Design
Intelligent cloud software to help you speed up and work out the excellent design easily.

Presentation
Mutil-design tool to increase customer flow, 720 VR panorama visualize your future home.

Production
Integration of design and production, to increase work efficiency and reduce the cost.

A Professional Platform To Connect Supliers Designers And Consumer

Supply Chain
Supply chain to business, one-stop resources integration, to share entire categories in the Cloud.

Brand Gallery
Professional brand promotion to popularize enterprise's products, design and brand image.
